

## The First 100 Prime Numbers (plus a few that aren't)

If a number ends with 0,  
2, 4, 6 or 8 it is **EVEN**.

If a number ends with 5  
or 0 it can be divided by  
5.

Find the numbers that are  
not prime.

2, 3, 5, 7, 11, 13, 17, 19, 23, 26,  
29, 31, 37, 41, 43, 47, 53, 54, 59,  
61, 67, 71, 73, 75, 79, 83, 89, 97,  
101, 103, 107, 109, 113, 127, 128,  
131, 135, 137, 139, 149, 151, 157,  
163, 167, 173, 175, 179, 181, 191,  
193, 197, 198, 199, 211, 223, 227,  
229, 233, 239, 241, 244, 251, 257,  
263, 269, 271, 277, 281, 283, 285,  
293, 307, 311, 313, 317, 318, 331,  
337, 347, 349, 353, 359, 362, 367,  
373, 379, 383, 385, 389, 397, 401,  
409, 410, 419, 421, 431, 433, 439,  
443, 449, 457, 461, 463, 470, 472

Hint – Have a  
look at the last  
digit of each  
number and  
apply the  
above rules 😊
