

# JUMP 8s

8	32	64	24
56	16	80	72
48	0	0	40

## What to do:

1. Draw this grid on concrete using chalk. Each square should be about 30cm by 30cm.
2. Two players stand with their feet in the large feet facing the game board.
3. A 'Caller' asks a question from one of the cards.
4. When a player has worked out the answer they must **jump** from their spot onto the correct answer. **Do not move until you know the answer.**
5. Players then rotate positions but the winner stays to compete with next player.

NB The object of the game is to have a bit of fun while you learn some of the facts so make an effort to learn the 8x facts while you're standing in line.

## Remember to play safe!

Use calculators if your teacher says it is OK.
