

Cone Net based on a three quarter sector of a circle.

1. Cut out the net and the circular face.
2. Score the net then sticky tape it together.
3. Trace around the bottom of the net to draw a circle onto cardboard which will be an exact fit for this cone.
4. Cut out the circle and use the tabs on the net and sticky tape to attach the new circle.
5. Glue the cartoon of the guy with the 'circular face' onto the bottom of the cone.
6. Display your cone 😊
