

The Chessboard problem is another of my favourites. It is so good to see the students struggle and then experience success.

Here are the pieces to place. Please have each child initial the back of them so that when they fall on the floor it easy to find out who owns the piece :-)

If you like this puzzle feel free to email it on and encourage your friends to visit my website for heaps more teaching resources. <http://www.adrianbruce.com>

The Chessboard Puzzle

from www.adrianbruce.com

Using 8 pieces you must use the 'guess and check' strategy to place them on the board so that there are no other pieces on the same vertical, horizontal or diagonal line.
